CV no / ID:	40065
Main Expertise:	Java Developer
IT Experience since:	2007
Education degree:	Master's Degree in Information Technology
Other notes:	Available to start within 20 business days

Summary

Full Stack Software Engineer and Solution Technical Architect with over 10 years of experience designing and developing web applications, APIs, and enterprise-grade software. Skilled in architecting solutions, and delivering applications using Java, Spring Boot, Angular, and Node.js. Since October 2020, I have been working as a contractor through my own consultancy firm and outsourcing companies, delivering value to clients in insurance, telecom, retail, and finance sectors.

Skills/Competencies:

Expert:	Java, Spring Boot, RESTful APIs, PostgreSQL, Oracle, MongoDB, DynamoDB, Kubernetes, Docker, Jenkins, Gradle, Maven, AWS, CI/CD, IntelliJ, Eclipse, VS Code, Agile/Scrum.
Advanced:	Node.js, Angular, TypeScript, GraphQL, UML, ArchiMate, Secure Development Practices, PL/SQL, Web3 prototype design, data warehousing, EDI systems
High Competence:	Solution architecture, client consulting, banking systems, insurance platforms, telecom platforms, cross-functional collaboration, pre-sales support.

Project Experience:

IT SKILL HOUSE
IT skill with care, quality and commitment

Feb 2024 - Present

Solution Technical Architect / Software Engineer

n/a

- Contracted through Accenture to deliver architecture and development services to enterprise clients.
- Designed system architecture and implemented backend services for B2B marketplace and insurance solutions.
- Developed cloud-based integration using AWS components and microservices architecture.
- Developed RESTful APIs and contributed to Angular-based front-end modules.

Dec 2020 - Feb 2024

Software Engineer / Solution Architect

n/a

- Contracted through Addendum to provide software engineering and architectural services to telecom and finance clients.
- Responsible for designing solution architecture in the Luminor project within the risk management domain.
- Developed RESTful APIs for the Danske Bank project. Architected and developed Java Spring Boot, REST and GraphQL APIs.
- Built Angular applications across telecom and banking domains.
- Designed Web3-based application prototypes for decentralized business cases.
