Intermediate

SEO

Project Experience:

Nov 2022 - Ongoing

Mobile developer

N/A

Projects:

● Mobile Point of Sale:

Engineered an advanced e-commerce platform that enhances sales efficiency through

seamless integration of Tap to Pay and Bluetooth connectivity for card readers and printers.

Spearheaded the incorporation of Stripe for robust payment security and implemented

cutting-edge credit card recognition and barcode scanning technologies to optimize the

checkout process.

● Mobile CRM App:

Developed a feature-rich customer relationship management tool that supports a robust

chat system, notifications, a text editor, and HTML to Dart conversion. Incorporated native

payments. Implemented complex forms, extensive data filtering, and search features,

significantly improving data management and user engagement.

● Social Marketing App:

Designed and launched a dynamic social media management tool that enables scheduled

postings across various platforms, enhancing marketing efficiency. Integrated social

authentication, a high-end image editor, interactive calendars, and animations, significantly

enriching user interaction and streamlining campaign operations

SEO DART HTML Programming Language

Apr 2021 - Oct 2024

Dart/Flutter developer

Freelance projects

Project 1: Independently developed and launched a financial app to help users manage spending and

identify marketing tricks, enhancing consumer financial literacy

Project 2: Led the development of a collaborative social networking app enabling users to manage

video projects, facilitating enhanced digital interaction and content sharing

Nov 2021 - Nov 2022
