CV no / ID	44403
Main Expertise:	QA automation
IT Experience since:	2018
Education degree:	HR management/ Personnel administration (Master) Computational Linguistics (Bachelor)
Other notes:	Part-time candidate (evenings and weekends), can start within 1-2 weeks.

Summary:

Working with Test Automation, CI/CD, DevOps configurations. Testing applications with Manual and Automated Testing (E2E) capabilities.

Tools that are always my friends: VS Code, Bash Unix (Linux), PowerShell, Docker, Cypress.io, Apache Jmeter, TestRail, BrowserStack, Axure, Figma, Photoshop, Illustrator, After Effects, Premiere, Browser test recorders (like Selenium, Katalon etc.), GitHub Actions, GitLab, Soap UI, Ngrok tunnelling, Version Control.

Acceptable to perform the Testing types: Functional, Performance (Load, stress), Usability (UX), User Interface (UI), Compatibility, DDoS, DoS testing. Good with TestRail test management also.

Skills/Competencies:

Advanced	Cypress, Manual Testing, Test automation
High Competence	Docker, JMeter
Basic Knowledge	AWS

Project Experience:

Apr 2019 - May 2024

QA Tester / QA Engineer

N/A

Working with various size and industry e-commerce projects.

* Responsible for quality improvement

* Quality check

* Responsible for bringing into the projects various innovative solutions

* Writing test scripts for automated testing

Since there's no DevOps specialist in our company, it happened that within the testing I had to do some tasks in DevOps field as well and got quite intrigued and started diving deeper into it. Currently learning AWS.

Main tech stack: Cypress, docker, jmeter

Jan 2018 - Mar 2019

Tester and UX/UI, Web designer

N/A

* Making Unique Web Design with Figma, PS and an AI.

* Attention to Human Psychology with machine interactions.
