CV no / ID	44523
Main Expertise:	Bubble.io , No-Code Solutions
IT Experience since:	2020
Other notes:	Experienced no-code developer. Specializes in bubble.io. Is Bubble.io certified

Summary:

I've been nocoding since 2019. Before that, I came to nocode not from development, but from business. And that helps me these days to be different, because I can talk with clients on more than just tactical technical details. Usually, I play a fractional CTO role, where the founder(-s) is a sales, or marketing person, while I take away all their worries about the technical side of the business.

Have my team, as well as a wide range of partners from all over the world (work mostly with people from USA, LTU, GER, MEX, TUR).

I pride myself on making my apps beautiful. Have seen enough developers not taking notice of how the apps look like, making them appear less professional.

I have audited dozens of apps, made on bubble. What that has taught me, seeing all of the bad apps, is why they are good or bad, and the problems the bad ones bring to the clients.

That is how I formed my development motto: I spend a lot of my attention on coding technique. I work a bit differently from most developers, in that they usually try to make things as quickly as possible ("it's a startup, this thing will change in 2 weeks, no need to spend more time. It just has to barely work"), while I work on a premise, that all apps are pieces of the puzzle, and I have to make them good enough to not break, no matter if they are changing, or any other piece. I call this view ("I don't want to see this again unless it changes"). This makes my apps way higher level, with fewer bugs, and way more resilient. Any other high-level developer can jump in and start working, so teamwork is way easier. Also, this makes the development way quicker from, say, 2-3 weeks onwards.

I am an active member of the worldwide bubble.io community, participating in events, and communicating with the Bubble company employees.

Skills/Competencies:

Expert	Bubble.io

Advanced	Project Management, UX/UI Design
Intermediate	FlutterFlow, xano
Basic Knowledge	HTML/CSS/Javascript

Project Experience:

Apr 2023 - Ongoing
Oklahoma, USA

Freelance nocode developer

Company in USA

A parking application for parking lots near large venues (Casinos, Amusement parks etc.), based out of Oklahoma, US. The interesting part of this application is that it was built from scratch to first revenue in 3 days. During that time I designed and built a driver's app, an app for parking enforcement, and a dashboard for the management of the parking lot.

Now continuously managing and upgrading the app.

Project Management, UX/UI Design, Bubble.io

Aug 2022 - Ongoing
Austin

Freelance developer

Company in USA

An Austin, TX based business, growing diamonds from deceased people's ashes (or other materials with Carbon in it). Built all sorts of internal tools for them, including direct-to-consumer shopping pages and funnels, Customer experience app, internal tools for the team, a partnership portal etc.

Previous Shark Tank participants. Investors include Mark Cuban.

Project Management, UX/UI Design, Bubble.io, HTML/CSS/Javascript

Mar 2022 - Ongoing
Philadelphia

Freelance nocode developer

Company in USA

A directory to connect startup founders with angel investors. Managed by First Round (based in Philadelphia, US), one of the biggest investment companies in the US. Built this app from scratch and continuously managing and improving it.

Used by folks from the largest US companies: Apple, Amazon, Google etc., as well as at least one current NBA player.

Project Management, UX/UI Design, Bubble.io

Oct 2020 - Mar 2021
Sydney

Freelance nocode developer

Company in Australia

Rise plus is an educational platform for children, based out of Australia, though the team is scattered around the world.

I was their "bubble guy". My main goals were to transfer the design out of Figma to bubble, as well as build all the underlying logic in bubble. The databases were custom-made, outside of bubble, and managed by another team.
