## Summary

Passionate QA Automation Engineer with over 2 years of experience in test automation. Strong background in web and mobile automation using TypeScript, Playwright, WebdriverIO, and Appium. Motivated to continuously improve and expand knowledge in test automation. Aiming to contribute to high-quality software development by working independently or in a team, seeking a challenging role in automation testing.

## Skills/Competencies:

| | |
|---|---|
| **Expert:** | TypeScript, WebdriverIO |
| **Advanced:** | Appium |
| **High Competence** | Playwright, Postman, CI/CD, Manual QA |
| **Intermediate Knowledge** | Postman |

## Project Experience:

Nov 2023 - Present

### QA Automation Engineer

n/a

- Design, develop, and maintain a custom mobile test automation framework using TypeScript, WebdriverIO, and Appium.
- Build and support automated test suites for iOS and Android devices, ensuring high test coverage.
- Work independently as the sole QA automation engineer, owning the entire test automation lifecycle — from architecture to execution and reporting. - Integrated automated tests into CI/CD pipelines.

May 2023 - Oct 2023

### Senior QA Tester

n/a

- Web Automation: Worked with JavaScript and Playwright to maintain and enhance the test automation framework. Developed new end-to-end test cases to ensure application stability and prevent regressions.
- Mobile Automation: Built mobile test automation from scratch using Appium, WebdriverIO, and TypeScript. Achieved the highest automated test coverage across the QA guild.
- API Testing: Used Postman mainly for response verification – validating API responses based on functional requirements.
- Manual Testing: Performed exploratory, regression, and functional testing on both web and mobile applications.

Aug 2021 - Jul 2022

### QA Engineer

n/a

Jan 2019 - Jul 2021

### Quality Assurance Analyst

n/a

## Education:

2016 - 2020

Vilnius Gediminas Technical University, Information Technology Service Management
